Matriculation Gyan Niketan 95%	2018 Patna, India

PROJECTS

UsabilityHub-Clone

Bringing Familiarity to a Fresh Experience: UsabilityHub Clone Website

- HTML5, CSS3 with Flexbox have been implemented to develop a responsive and visually appealing user interface.
- User Interface (UI): The user interface of the clone is intuitive and user-friendly, providing a seamless experience for visitors.
- Replicated Design: The clone website closely resembles the original website in terms of layout, color schemes, typography, and overall visual appearance.
- Grid Layout: Used CSS Grid or Flexbox to create a grid layout, replicating the original website's content organization.

Portfolio:-

- This project was developed using HTML5, CSS3, and Vanilla JavaScript to create a responsive and interactive user interface.
- Dark/Light Mode: Offer users the option to switch between 2 different modes for a more personalized experience.
- Navbar: Smooth scrolling or interactive effect have been deployed in the navigation bar with 6 different sections for smooth transitions.
- Themes: a theme color switch style in your portfolio allows users to change the website's appearance with 5 different colors based on user preferences.
